

# Paper Bag House

## Materials:

Paper bag  
Colorful paper  
Markers/crayons  
Glue  
Scissors

## Instructions:

Make a fold at the top of your bag so you know where the roof will go. Otherwise, keep the paper bag folded flat while you glue the parts onto your house.

Thinking about some of the architectural details you learned, cut out doors, windows, and other decorations, then glue them onto the house. You may also draw your decorations on.

Once you are finished gluing all the pieces to the front of your house, carefully open the bag and stuff it with paper. (Look in the recycling bin!)

To make the roof, fold a piece of paper (that's wider than the top of your bag) in half, then glue or staple it to the top of your bag. Do not go past the crease where you already made the fold or else the roof might cover up the items you already glued on.
